PROFESSIONAL SUMMARY

Staff Software Engineer with 10+ years of experience designing scalable distributed systems and leading cross-functional engineering teams. Proven track record of driving architectural decisions that reduced build times by 78%, cut operational costs by 46%, and improved deployment velocity across 8+ teams. Expert in full-stack development, microservices architecture, and AI-assisted development adoption. Strong technical mentor who has guided engineering teams through major technology stack migrations and established CI/CD best practices. Combines deep technical expertise with business acumen from sales background to deliver high-impact, user-focused solutions. Founder of ZaZet Solutions (SMB automation). Open to Staff/Senior backend & platform roles in the EU from June 2026.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Node.js, Python, PHP, SQL

Frameworks & Libraries: React.js, Angular, Nest.js, Spring Boot, Koa, Express, Vaadin, Hibernate

Cloud & Infrastructure: AWS (Lambda, SQS, SNS, DynamoDB, Step Functions, Elastic Beanstalk), Docker, Kubernetes (K8s), Serverless

Databases: MongoDB, MySQL, DynamoDB, Elasticsearch, PostgreSQL

DevOps & Tools: CI/CD, GitHub Actions, CircleCI, Jenkins, OpenAPI/Swagger, RabbitMQ

Testing: Playwright, Jest, Mocha, JUnit, Cypress, E2E Testing, Unit Testing

Architecture: Microservices, Event-Driven Architecture, RESTful APIs, System Design, State Machines

PROFESSIONAL EXPERIENCE

Founder · Principal Engineer

ZaZet Solutions | Zagreb / Remote | June 2026 - Present

- Founded ZaZet Solutions — custom operational systems and automation for SMBs (booking, payroll, internal tools) in HR, EN, and HE.
- Deliver staff-level platform engineering and consulting alongside selective full-time opportunities.
- Tech Stack: TypeScript, Node.js, React, NestJS, PostgreSQL, AWS, platform/DX practices

Senior Software Engineer

Sedric.ai | Remote | June 2025 - April 2026

- **Spearheaded organization-wide AI-assisted development adoption** through Claude Code workshops, internal documentation, and gamified engagement strategies, driving measurable increases in developer productivity
- **Architected and launched a unified developer data platform** consolidating data from multiple cloud providers and databases into a single intuitive interface, reducing engineering overhead and enabling CSM teams to investigate and resolve issues independently
- **Tech Stack:** Python, Node.js, React.js, TypeScript, Nest.js, OpenAPI, AWS, PostgreSQL, GitHub Actions, Playwright, Mocha.js

Senior Software Engineer

Novu.co | Remote | April 2024 - June 2025

- **Achieved 78% reduction in build time** by consolidating community-driven modules into a single optimized master module with advanced tree shaking capabilities
- **Enhanced developer experience** by creating CLI code generators for new notification channels, significantly accelerating open-source community contributions
- **Integrated public OpenAPI specification** into existing CI/CD pipeline, ensuring seamless deployment and code quality across releases
- **Redesigned API architecture for Novu V2 framework**, establishing a robust CMS-like system for managing notification pipelines at scale
- **Tech Stack:** Node.js, React.js, TypeScript, Nest.js, OpenAPI, AWS, MongoDB Atlas, GitHub Actions, Playwright, Mocha.js, Microservices

Staff Software Engineer

Shopify / Flexport | Remote | June 2022 - February 2024

- **Reduced operational delays by 70%** by designing and implementing a Conversational Bot providing access to WMS functionalities not available in traditional interfaces

- **Improved On-Time-Shipping OKR to 97%** by leading implementation of event-driven shipment tracking mechanism, enhancing visibility and customer satisfaction
- **Owned cross-team integration design**, implementing decoupled dependencies that increased feature development velocity and reduced maintenance overhead across multiple engineering teams
- **Eliminated 3-hour manual overhead per inventory transfer** by designing and building automated freight consolidation logic and ordering process
- **Tech Stack:** Node.js, React.js, TypeScript, Java, AWS (SQS, SNS, Lambda, Step Functions), Serverless, MySQL, DynamoDB, CircleCI, Playwright, Jest

Senior Software Engineer

Deliverr (Acquired by Shopify) | Remote | January 2022 - June 2022

- **Led B2B product initiative from 0 to 1**, designing system architecture for new business vertical
- **Reduced development overhead by 90%** by initiating Lambda-to-scalable-solution migration with auto-generated OpenAPI contracts, clients, and Postman collections
- **Drove organization-wide tech stack adoption** by building coalition across teams; scaled from 1 team with 1 service to 8 teams with 14 microservices within 6 months
- **Saved 10+ hours weekly** for operations teams through custom Google Sheets automation solutions and reduced manual errors from 30% to negligible
- **Tech Stack:** Node.js, TypeScript, React.js, Java, AWS (SQS, SNS, Lambda), Serverless, MySQL, DynamoDB, CircleCI, Jest, Microservices

Senior Backend Engineer

Wochit | Tel Aviv | April 2020 - January 2022

- **Reduced version turnaround by 50%** by initiating E2E testing strategy and mentoring automation developer, freeing QA from regression testing
- **Achieved 80% reduction in feature development time** for support team by redesigning back-office system using Vaadin; system fully adopted for all CSM needs
- **Led zero-downtime Elasticsearch migration** from self-managed v2.7 to hosted v8, achieving 46% cost reduction and 99% reduction in maintenance-related downtime
- **Freed 10 engineering hours weekly** by automating deployment preparation through GitHub commit analysis
- **Tech Stack:** Java, Spring Boot, Elasticsearch, RabbitMQ, MongoDB, Vaadin, Kubernetes, AWS, OpenAPI, JUnit, Cypress, Jenkins

Full Stack Developer & Junior Architect

Siemens PLM | Tel Aviv | April 2018 - April 2020

- **Developed SaaS collaborative platform** with full-stack responsibilities (70% Java backend, 30% Angular frontend)
- **Tech Stack:** Java, Spring Boot, Angular 8, AWS Elastic Beanstalk, MySQL, Microservices, Jenkins, OpenAPI, Karma.js, JUnit

Full Stack Developer

Jebo GMBH Commerce | July 2014 - April 2018

- **Tech Stack:** PHP, JavaScript, HTML, CSS, MySQL

EDUCATION

Bachelor of Arts in Information Systems

Ben-Gurion University of the Negev | 2014 - 2017

LANGUAGES

Hebrew (Native) | English (Fluent) | Croatian (Conversational)
